

Maintenance Tips

Dust mop or sweep your floor regularly. If you sweep, we recommend a nylon broom (as straw brooms tend to be too rough on some finishes)or a micro-fiber mop.

Make sure your tables and chairs have soft felt floor protector pads (available at Darmaga) on the bottom of their legs to help prevent scratches. The felt pads must be kept free of grit, and will periodically need to be replaced.

Use exterior mats and an area rug inside the door to help keep grit off your floors.

Put area rugs in high traffic areas, especially in front of your kitchen sink, stove and refrigerator.

Keep your pets nails clipped.

Do not slide appliances across your floor without protectors.

Shoes should be properly maintained. Worn or damaged heels may cause damage to your hardwood floors.

Directions

This cleaner easily cleans prefinished, parquet, floating & hardwood floors. The cleaner is non-abrasive & leaves absolutely no trace or residue.

For spills or spot-cleaning, spray directly on floor or mop cover, and clean as needed.

For general cleaning, spray an area 4'x4', or spray directly onto mop cover, making sure not to over-wet your floor. Too much liquid will cause damage to your hardwood floor—go over area until dry.

Never use a string mop or sponge mop unless it is wrung out. Too much liquid will cause cupping of your hardwood floor.

To refill the 700 ml spray bottle, just add the indicated amount of Concentrated Hardwood Floor Cleaner, and then fill the remainder with clean water.

For Mop Cover cleaning, machine wash and dry.

Note: Do not use on oiled, waxed or unfinished floors.

Cleaning Products Available

3.6 L Concentrated Hardwood Floor Cleaner

Darmaga Hardwood Floor Cleaner

Let Darmaga Hardwood Floor Cleaner take the worry out of maintaining your hardwood floors. This biodegradable and phosphate-free cleaner is formulated for today's no-wax & non-oiled finishes.

It lifts the dirt without leaving a residue and dries fast. It also contains no oils or waxes that attract and hold debris or make your floor slippery.

Although vinegar and water is often recommended as a cleaner for hardwood floors, it lacks the lifting agents needed to clean properly and also may dull your floors.
